0 Allgemeines

Am 3.1.2007 wurde das Argelander-Institut für Astronomie zum ‘Ort im Land der Ideen’ ausgezeichnet, wobei vor allem der neu geschaffene Studiengang Master of Science in Astrophysik ausschlaggebend war. Die Verleihung der Auszeichnung wurde durch eine öffentliche Veranstaltung begleitet, in der über die Studienmöglichkeiten in der Astronomie und die Forschungsaktivitäten am Institut informiert wurde und Besucher eigenständig Beobachtungsdaten am Rechner auswerten konnten.

Nach zwei erfolglosen Versuchen, die Nachfolge der Professur von Klaas de Boer, der zum 28.2.2007 in den Ruhestand trat, im Bereich optischer Astronomie zu besetzen, wurde Ende 2007 die Stelle sehr breit neu ausgeschrieben; das Berufungsverfahren läuft zur Zeit. Bodo Ziegler (Göttingen) konnte für die Professorenvertretung im Zeitraum 1.4.–31.7 und 1.10.–30.11. gewonnen werden, bevor er dann eine Stelle bei der ESO annahm. Seit dem 1.12. wird die Professur von Jürgen Kerp vertreten. Im Gegensatz dazu war das Berufungsverfahren für die W2-Professur in der Astrophysik erfolgreich; Cristiano Porciani wird die Stelle zum 1.7.2008 antreten. Mit Olaf Wucknitz konnte auch eine weitere Emmy-Noether Gruppe am AIfA angesiedelt werden, und drei neue Humboldt-Stipendiaten kamen in 2007 ans Institut.

Wissenschaftler des AIfA sind in eine große Zahl von Kooperationen eingebunden. Beispielsweise sind 4 Teilprojekte des Köln-Bonner Sonderforschungsbereich 494 “Terahertz-Spektroskopie”, der Ende 2007 ausgelaufen ist, Beteiligungen an drei ortsübergreifenden Teilprojekten im Transregionalen Sonderforschungsbereich TR33 “The Dark Universe” (gemeinsam mit Kollegen aus Heidelberg und München/Garching), neun verschiedene Projekte im DFG-Schwerpunktprogramm 1177 “Galaxienentwicklung” und der Beginn des Marie Curie RTN-Netzwerks “DUEL”. Zusammen mit weiteren Kooperationen – erwähnt werden sollen hier etwa das Rhine Stellar Dynamics Network, die Ansiedlung des deutschen ALMA Regional Centers und eines der OmegaCAM Datenzentren – und weiteren Einzelprojekten war das AIfA bei der Drittmittelinwerbung sehr erfolgreich. Von drei Rufen an Institutssangehörige (Philipp Richter an die Universität Potsdam, Pavel Kroupa an die University of Cardiff und Peter Schneider an die École Polytechnique Federale in Lausanne) konnten zwei erfolgreich abgewehrt werden.

In der zweiten Runde der Exzellenzinitiative wurde die Bonn-Cologne Graduate School in Physics and Astronomy ausgewählt, an der das AIfA zentral beteiligt ist. Zusammen mit der Bonn International Graduate School und der International Max-Planck Research

School sowie dem Studiengang Master of Astrophysics ist Bonn im Wettbewerb um herausragende Doktoranden damit gut gerüstet.

Das Observatorium Hoher List wurde verstärkt in den Ausbildungsbetrieb einbezogen, indem ein Versuch des Fortgeschrittenen-Praktikums im Rahmen des Langzeitprojekts HO-LIGRAIL eingerichtet wurde. Umfangreiche Pläne für eine Fortentwicklung des Observatoriums wurden in die Wege geleitet, zu denen die Einrichtung eines Astronomie-Museums gehört, sowie verstärkte Kooperation mit dem lokalen Fremdenverkehrsverband, um die Zukunft des Observatoriums langfristig zu sichern. Mehrere ‘Bonn-Shutters’ für internationale Großteleskope wurden geliefert bzw. neu bestellt. Michael Geffert hat zudem die Aufgabe des Koordinators der deutschen Öffentlichkeitsarbeit zum internationalen Jahr der Astronomie 2009 übernommen.

Im Rahmen von Drittmittel-Projekten, aber vor allem durch die Bewilligung eines HBFAG-Antrags, konnte die Hardware-Ausstattung des Instituts vergrößert bzw. modernisiert werden. Insgesamt ist das AIFA daher hervorragend für die laufenden bzw. bald beginnenden Beobachtungsprojekte wie der APEX-SZ Survey, die KIDS, VIKING und PanSTARRS-1 Surveys sowie umfangreiche Simulationsprojekte vorbereitet.
